

Migration Exchange Server 2016/2019

The Exchange Server features numerous integrated security functions and an advanced enterprise messaging platform. Especially in the area of high availability the Exchange Server shows its strengths. Anyone who wants to use these new functions must be aware that the new version also has changed the technology and structure of the communications server. For a smooth upgrade, a carefully considered and well-planned procedure is therefore absolutely essential. This „Consulting in a Box“ package supports Exchange project managers and IT managers in migration planning. For this purpose, experienced consultants analyze the system and messaging environment and design an individual roadmap for the upgrade or migration. With the results of this strategy consulting, you will start your Exchange project optimally prepared.

Your benefit

- » **Transparency:** You receive an overview of your current network with regard to an upcoming Exchange migration.
- » **Technology Consulting:** We explain the dependencies of Exchange and your current operating system.
- » **Experience:** You work with senior Exchange consultants from a Microsoft Gold Certified Partner.
- » **Independence:** You receive a customized rough concept as a basis for your further project steps.
