Introduction

Microsoft SharePoint 2013/2016

Your goal is to further improve the cooperation of teams and people in your company? Do you want to increase productivity and accelerate processes by making all relevant information quickly available?

Many companies have been able to achieve extraordinary success with the introduction of Microsoft SharePoint Server. Because SharePoint Server 2013/2016, SharePoint Foundation 2013/2016 and Office 2013/2016 make it easier for companies to efficiently integrate information and processes. They simplify the creation and exchange of information, optimize internal and external communication and thus make a sustainable contribution to improving productivity in the company. With this "Consulting in a Box" package, you lay the foundation for a successful implementation in your company. Experienced consultants analyze the prerequisites and check the integration possibilities in existing information platforms. With clear recommendations for action, they show you the way to an optimal portal structure for collaboration, information and integration.

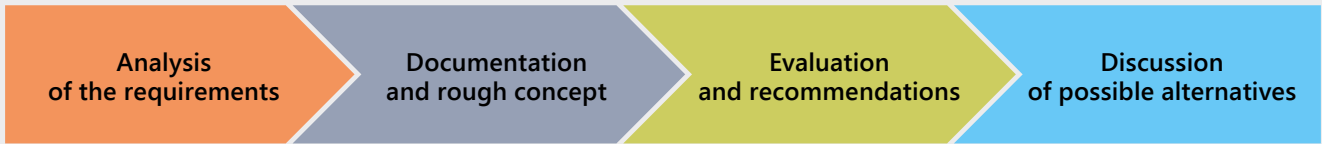

Your benefit

- » **Transparency** – we discuss possible portal structures, determine the project scope and recommend the best approach.
- » **Alternatives** – we outline further application scenarios for intranet, search, process automation and content management.
- » **Holistic** – we explain the dependencies of the portal structure on your current application structure and processes.
- » **Know-how transfer** – we discuss alternatives with you and answer your questions about SharePoint
- » **Independence** – you receive a rough concept that forms the basis for further project steps such as detailed concept and realization.
