

# Microsoft Public Key Infrastructure

E-mail security, legally binding signing of electronic documents and secure wireless networks are requirements for today's security solutions. Together with your IT-managers, our security-certified consultants analyze your system landscape. Based on the results, they show you the various possibilities, benefits and risks of a PKI infrastructure. In addition, we also point out legal requirements and guidelines. With our final written recommendations, you receive documentation and an action guide that summarizes how a PKI can optimally support your enterprise-wide security solution.

## Your benefit

- » In a workshop tailored to your needs, you will learn about the possibilities and limitations of a PKI infrastructure.
- » Through discussion with the didactically trained AddOn Consultant, you will expand your know-how.
- » We explain in detail the dependencies and areas of application and answer your questions about the introduction of a PKI.
- » As a conclusion of the analysis you will receive a comprehensive documentation as a rough concept for the implementation.
- » You will work with certified security consultants from a Microsoft Gold Certified Partner who have a lot of experience in planning and operating complex server structures.

V3.0

## Microsoft Public Key Infrastructure

### Objective

- » Analysis and documentation of your requirements in a one-day workshop (e-mail encryption/signature, wireless LAN authentication, smartcard authentication, code signing, audit-proof documents, SSL/TLS, encrypted file system etc.)
- » Development of possible PKI infrastructures in your system landscape and subsequent discussion of variants
- » Development of a rough concept as a basis for the implementation of a PKI infrastructure

### Our services

- » Analysis of the initial situation
- » Determination of requirements
- » Documentation of the requirements analysis
- » Development of the PKI infrastructure
- » Discussion of the PKI infrastructure
- » Elaboration of a rough concept
- » Evaluation, discussion and final recommendation
