

Out of the Patch Madness

Deploying and distributing Microsoft updates is a challenge for many organizations. With Windows 10 and Office 365, Microsoft update distribution routines are changing with cumulative updates, express updates, and required feature updates and deployment rings.

This offering allows you to efficiently deploy updates for Windows operating systems, Office, and other Microsoft products with System Center Configuration Manager in minutes per month. We have combined our many years of experience into a „Best Practices“ package, which helps you to plan, distribute and monitor Microsoft Quality and Feature Updates in a structured way with minimum effort.

Benefits

- » **In concrete terms:** You will learn how to update your systems to the latest version in a short period of time.
- » **Security:** Your systems are always up to date
- » **Competence:** Benefit from the many years of experience of our consultants
- » **Cost advantage:** Minimize time and costs for updates
- » **Individual:** you receive a rough concept tailored to your company

Out of the Patch Madness

Objective

- » Describe ways out of the „update“ hell
- » Explanation of the various updates
