

SAP Unicode – Rough Concept and Migration

Unicode is mandatory for SAP in many cases, e.g. for a migration to SAP HANA, S/4HANA or SAP ASE. The requirements for SAP products based on NetWeaver 7.50 go even further. No non-Unicode kernel is delivered for them at all. For example, an upgrade to SAP ERP 6.0 EHP8 requires that the SAP system has already been previously migrated to Unicode.

In addition to the technical necessity, Unicode simplifies the entry and exchange of data in different languages and fonts for internationally operating companies. As a uniform standard, Unicode ensures that all existing fonts can be displayed and processed across platforms. This makes costly country adaptations a thing of the past and improves worldwide communication with customers and suppliers. With Unicode, you can reduce costs, increase flexibility and improve your competitiveness.

Use this „Consulting in a Box“ package for optimal preparation of a Unicode migration. We estimate your costs, recommend the best migration path and describe your next steps in a rough concept. A detailed sizing lays the foundation for procuring optimal hardware and planning virtual machines.

Your benefit

- » You receive platform-neutral recommendations from experienced consultants.
- » You bring your SAP know-how up to date.
- » Our recommendations improve your migration planning and increase your project security.
- » The practice-oriented transfer of know-how makes you more independent.
- » The detailed sizing of your Unicode systems improves your future investment decisions.
- » You know the effort and time required for the Unicode migration project.
- » User-friendly documentation allows you to plan your further project steps professionally.

SAP Unicode – Rough Concept and Migration

Objective

- » Development of know-how for SAP Unicode migration
- » Determination of the migration requirements (SCP, MDMP, existing languages)
- » Creation of a rough concept
- » Planning of the migration preparations
- » Consideration of possible OS/DB changes
- » Rough sizing of the required hardware for productive operation
- » Planning a possible OS/DB release change or OS/DB migration
- » Recommendation of measures to ensure SAP operation
- » Discussion of the advantages and disadvantages of different migration variants
- » Review of options for cost reduction

Our services

- » Introduction to Unicode (overview, migration steps, resource requirements)
- » Analysis of the current SAP system landscape (modifications, in-house developments, workload, performance, HW resources, MDMP or single-codepage system, planned SAP upgrades and EHP installations, interfaces, printers, archiving, etc.)
- » Planning workshop for Unicode migration (migration preparation/implementation, sequence of individual steps, required hardware (CPU, RAM, SAPS) and software releases (OS, DB, SAP), skills and resources, avoiding downtime, testing virtualization, consolidation, high availability)
- » Documentation and presentation of the results and advice on additional project steps

More successful Projects – “Consulting in a Box”

AddOn has drawn on its experience of finding optimal solutions for numerous projects to create an exceptional offer: Our “Consulting in a Box” packages. These stand for clearly defined consulting services for specific tasks. “Consulting in a Box” also means a structured

approach by experienced consultants, detailed analysis, professional documentation, presentation of results, open discussion of the best solutions plus specific recommendations for action.

You’ll find more “Consulting in a Box” offers for SAP, Virtualization, Microsoft, and Linux on our website www.addon.net/cib

You benefit from:

- » Best practice solutions
- » Targeted recommendations
- » Fixed-price consulting services
- » No further obligations
- » Consulting services available at short notice
- » Short duration
