

Rough Concept for the Migration of SAP Applications

Are you thinking about updating of parts or the entire SAP infrastructure? Are you planning to implement SAP HANA or to change the operating system and database platform for one or more of your SAP systems? Then you should take a closer look at this „Consulting in a Box“ offer.

Because this service package supports you in preparing your migration with a sound analysis of your planned change and shows you the necessary steps in a well-founded rough concept. With this service, you lay the foundation for a secure change. You benefit from the expertise of experienced migration consultants and receive a well-founded rough concept with concrete recommendations for secure SAP application migration. The presentation and discussion of optional procedures gives you clarity about the costs and opportunities of migration.

Your benefit

- » **Know-how:** Benefit from the cross-system know-how and migration experience of our certified SAP Technical Consultants (e.g. through minimized downtime)
- » **Transparency:** You receive well-founded recommendations on migration paths, know the project scope, the project costs and the best approach.
- » **Decision:** You retain the decision-making authority over the further project steps
- » **Added value:** Improve your competitiveness through a modern IT infrastructure

Rough Concept for the Migration of SAP Applications

Objective

- » Description of the actual state
- » Description of the future infrastructure based on your strategic guidelines
- » Description of the migration steps for your SAP systems
- » Creation of a rough concept for the SAP migration
- » The rough concept can be created for different scenarios
 - Migration from SAP BW systems to SAP HANA
 - Migration from SAP ERP or CRM systems to SAP HANA
 - Migration of SAP systems to Windows or Linux and any database supported by SAP

Our services

- » As-is analysis
- » We support you in defining the work to be carried out by your specialist departments.
- » According to your individual infrastructure we give you recommendations regarding:
 - Sizing (CPU, RAM, storage volume and IO/sec)
 - Virtualization with Hitachi LPAR technology or VMware
 - High availability and, if necessary, disaster recovery including backup strategy
 - Necessary requirements (e.g. Unicode, Dual Stack Splitt)
