

# Migration of an SAP System Landscape

You have operated your SAP systems on the same platform for several years. At that time, this platform was certainly optimally designed to meet SAP's performance and availability requirements. But today you notice that your SAP systems are the only applications that still run on these special hardware and operating system platforms. Like the hardware, the database platform is now outdated. If you are planning to update your SAP landscape, this „consulting in a box“ is an ideal offer. As an example, here we offer you the implementation of SAP application migration to Windows or Linux as well as to any database supported by SAP. For other SAP application migrations as well as for any preparatory steps such as Unicode migration or the separation of dual-stack systems, we will be happy to provide you with an individual offer.

## Your benefit

- » **Adaptable:** Gain flexibility through migration to virtual servers
- » **Modern:** Modernise your data management by migrating the database
- » **Qualified:** Benefit from the extensive knowledge of certified SAP consultants and many years of migration experience
- » **Know-how:** Your administrators are familiar with the administration of the new database from the very beginning

## Migration of an SAP System Landscape

### Objective

- » Modernization of the SAP system landscape through migration to a cost-effective, high-performance and secure platform
- » Secure migration of the SAP systems through professional planning and support during the migration
- » Efficient changeover by using the tools recommended by SAP
- » Ensuring immediate readiness for work through accompanying training of the administrators

### Our services

The service includes a migration of the SAP system landscape with up to 4 SAP systems with a DB size of max. 1 TB (uncompressed, e.g. development-, quality assurance- and production system).

- » We analyze your initial situation.
- » We make binding statements on sizing and give you recommendations for the new system landscape.

- » We install the operating system and database on the new servers.
- » We migrate the SAP database to the new servers - including the preparatory and follow-up work prescribed by SAP (optional: with SAP Unicode Migration).
- » We adapt the profiles of SAP and the database to the new environment.
- » We take over other necessary work such as setting up the transport system, adapting printers, etc.
- » We integrate the new systems into SAP Solution Manager.
- » We support you in defining the tasks to be performed by your departments.
- » We train your administrators on the job and explain the correct procedure for regular tasks (backup, checks, statistics, patches, etc.).

Phone	E-mail	Order number	Duration	Prices are quoted exclusive of VAT and distance-based additional expenses.
+49 7031 7177 58	consulting@addon.de	CBS 21 M (without Unicode Migration)	24 days	€ 32 400,-
		CBS 21 L (with Unicode Migration)	28 days	€ 37 800,-

### More successful Projects – “Consulting in a Box”

AddOn has drawn on its experience of finding optimal solutions for numerous projects to create an exceptional offer: Our “Consulting in a Box” packages. These stand for clearly defined consulting services for specific tasks. “Consulting in a Box” also means a structured

approach by experienced consultants, detailed analysis, professional documentation, presentation of results, open discussion of the best solutions plus specific recommendations for action.

You’ll find more “Consulting in a Box” offers for SAP, Virtualization, Microsoft, and Linux on our website [www.addon.net/cib](http://www.addon.net/cib)

You benefit from:

- » Best practice solutions
- » Targeted recommendations
- » Fixed-price consulting services
- » No further obligations
- » Consulting services available at short notice
- » Short duration
