

# SAP HANA – Deployment and Migration

Your goal is to improve the competitiveness of your company by analyzing large amounts of data within seconds. To achieve this, you want to use the possibilities of in-memory computing and are planning to use SAP HANA. You already know how you want to use SAP HANA and now you want to implement the migration of your SAP ERP, CRM or BW system to SAP HANA or the replication of tables to SAP HANA.

Experienced SAP consultants install and configure SAP HANA and set up high availability and disaster recovery according to your requirements. Depending on the deployment scenario, we migrate your SAP ERP, CRM or BW system landscape to SAP HANA, or set up data replication in a side-by-side scenario.

## Your benefit

- » You benefit from the cross-system know-how and migration experience of our certified SAP Technical Consultants.
- » You have a high level of migration project and implementation security through cooperation with certified migration consultants with many years of migration experience.
- » Your administrators are familiar with the administration of the new database right from the start through "Training on the Job" and know regularly recurring administration tasks.
- » We only work with experts with many years of experience who are certified by SAP for heterogeneous SAP migrations.
