

S/4 Custom Code Check Starter Package

For the introduction of SAP S/4 HANA, it is necessary for companies to check their current, customer-specific ABAP programs for S/4 suitability with the help of Custom Code Check Systems (CCC). Handling these systems, however, requires appropriate know-how. You can only acquire this know-how through intensive training or time-consuming training. Instead, you prefer our Consulting-in-a-Box offer, which gives you the expertise you need.

Our experienced consultants carry out the custom code check installation and configuration for you. In this way, you benefit from optimal settings that are tailored to your company. By working closely with your employees, they are trained at the same time and can later independently configure and install additional apps.

Benefits

- » **Competent:** Benefit from the long experience and expertise of our consultants.
- » **Future-proof:** Make your IT ready for the future with S/4HANA
- » **Cost-effective:** You only buy the package that gets you ahead.
- » **First class:** Certified consultants support you with their cross-system know-how
- » **Individual:** Our consultants respond individually to the requirements of your company.
