

# SAP Fiori Starter Package

A lot of people want it. Only a few can do it. The introduction of SAP Fiori in companies costs time and requires appropriate know-how. But for most companies it is difficult to meet both requirements. SAP Fiori has so many practical functions. Among other things, they benefit from an optimized user interface that considerably simplifies the daily handling of SAP.

With this Consulting-in-a-Box offer, you can also use SAP Fiori in your company without intensive familiarization and training visits. Our experienced and certified consultants install and configure SAP Fiori. Together with you, they will select suitable Fiori apps and install them in cooperation with your employees. They learn how to install and configure apps independently in the future based on best practices.

## Benefits

- » **Documentation:** You receive a report on the installation and configuration of SAP Fiori.
- » **Individual:** Recommendations for the configuration are adapted to your needs
- » **Independence:** With the acquired knowledge you will be able to carry out measures independently in the future.
- » **Competent:** Benefit from the cross-system know-how of our certified consultants

## SAP Fiori Starter Package

### Objective

- » Professional installation and configuration of SAP Fiori by experienced consultants
- » Best Practices for an optimal SAP Fiori Configuration
- » Your employees will then be able to install and configure apps independently.
- » We compile a documentation with all relevant facts for you.
- » Clear recommendations for further action

### Our services

- » Analysis of your system environment and recommendation of the most suitable Fiori infrastructure for you (Distributed, Central, Cloud)
- » Installation of the latest Fiori release versions, patches, SAP note corrections
- » Basic Configuration of the SAP Fiori Frontend Server
- » Selection of one to two Fiori Apps suitable for you, incl. installation and configuration

- » Instruction of your employees in the complete process of Fiori procurement (selection via App Library, Maintenance Planner, Stack Download, SAINT Installation)
- » Setup and optimization of the Fiori Launchpad
- » Recommendations for setting up Fiori roles and user preferences
- » Introduction to the analysis of Fiori error messages and traces
- » Configuration of the system aliases, metadata and back-end RFC connections
- » Establishment of Fiori Housekeeping

### Scope

Our Service includes the setup of one Fiori frontend server with up to two Fiori apps and one connected backend system
