

SAP S/4HANA Test Conversion

Is your company planning to convert to SAP S/4HANA on-premise? You would like to be prepared for the SAP S/4HANA conversion at an early stage? You do not have sufficient IT staff or SAP HANA or Linux know-how to perform the SAP S/4HANA conversion yourself? Then our Consulting-in-the-Box offer is just right for you.

In this box, we offer you an SAP S/4HANA conversion of one of your systems (preferably your QAS system with the most up-to-date data possible from a PRD reverse copy) to the desired SAP S/4HANA release.

SAP S/4HANA sandbox conversion allows you to address the following questions early on:

- » How long are the SUM conversion (upgrade) runtimes?
- » How long is the SUM (upgrade) downtime?
- » What errors and/or inconsistencies occur during the upgrade?
- » What „showstoppers“ occur during the upgrade?
- » Which customer-specific Z programs are still functional in SAP S/4HANA?
- » Testing the SAP S/4HANA backup and recovery scenarios
- » Testing of SAP S/4HANA high availability scenarios

Your benefit

- » **Individual:** Get an SAP S/4HANA system with YOUR data and the desired SAP S/4HANA release level.
- » **Experience:** IT and business departments get to know the innovations of SAP S/4HANA at an early stage and can test various scenarios.
- » **Flexible:** It is possible to delete the system, simply set it up again, or to use a backup to test the SAP S/4HANA test system from a backup.
- » **First-class:** You receive excellent consulting from experienced and certified experts.

SAP S/4HANA Test Conversion

Variant 1: SAP S/4HANA conversion with SUM

If your SAP ERP Business Suite system is already running on HANA DB

- » either provide a test system with HANA as a current reverse copy of your PRD system, or
- » we create the test system as a copy from QAS or PRD.
- » We also perform the SAP-S/4HANA conversion with SUM on the test system and document all steps.

Variant 2: SAP S/4HANA conversion with SUM/DMO

If your SAP ERP Business Suite system is still running on anyDB and/or your SAP ERP Business Suite system is still running on EHP6 or lower, we start the SAPS/4HANA conversion on your QAS with SUM/DMO, migrating to the SAP-S/4HANATest system in one step and documenting each step.

The QAS source system is not changed during the SUM/DMO process and can continue to operate normally afterwards.

Our services

- » Implementation of an SAP S/4HANA conversion with SUM or SUM/DMO
- » Documentation of all steps performed
- » Consulting and support when errors occur or inconsistencies are resolved

Managed Services

- » Optional: We take over the operation of the SAP S/4HANA test system for the duration of the test project after the conversion (upgrade).

Phone	E-mail	Order number	Duration	Prices are quoted exclusive of VAT DB size between 500 GB-2 TB; Price for other DB sizes on request
+49 7031 7177 58	consulting@addon.de	CBS43 M SUM Option	8 days	Box price € 10 800,-
		CBS43 L SUM/DMO Option	10 days	Box price € 13 500,-

More successful Projects – “Consulting in a Box”

AddOn has drawn on its experience of finding optimal solutions for numerous projects to create an exceptional offer: Our “Consulting in a Box” packages. These stand for clearly defined consulting services for specific tasks. “Consulting in a Box” also means a structured

approach by experienced consultants, detailed analysis, professional documentation, presentation of results, open discussion of the best solutions plus specific recommendations for action.

You’ll find more “Consulting in a Box” offers for SAP, Virtualization, Microsoft, and Linux on our website www.addon.net/cib

You benefit from:

- » Best practice solutions
- » Targeted recommendations
- » Fixed-price consulting services
- » No further obligations
- » Consulting services available at short notice
- » Short duration
