

SAP Virtualization Check & Sizing

Virtualization of IT infrastructures promises many advantages: Optimal use of existing hardware resources, simplified handling, more hardware independence, up to 40% lower IT costs, higher availability and more flexibility. However, not every company achieves the hoped-for results and many virtualization projects end with disillusionment.

With the SAP Virtualization Check by AddOn you can take a look into the future of your IT. We analyze your current system landscape and tell you which advantages you can achieve with virtual servers. Our SAP and VMware certified consultants determine your individual virtualization or consolidation potential. We create a vendor-neutral sizing with detailed information about your future virtual machines for SAP and ESXi hosts for you. Together with you, we develop a rough concept for a consolidated and future-proof IT landscape.

Your benefit

- » Deepened knowledge of virtualization/consolidation possibilities.
- » More performance and flexibility for your SAP system landscape.
- » Optimal sizing of your virtualized and physical infrastructure.
- » Cross-system practical experience of our consultants
- » Simplified administration and optimized utilization of your systems.
- » Improved availability of your SAP applications.
