

Virtualization Check for Virtual Desktop Infrastructures

Now that most companies have completed the virtualization of their server infrastructure, many are considering virtualizing their end-user desktops. This step is all the more obvious as new end devices such as tablet PCs, netbooks or smartphones become more widespread in companies and as employee mobility shifts work away from the traditional office workplace. Due to the high complexity of desktop infrastructures, a change from one day to the next is not easily possible. The high number of installed applications of different versions, a complex composition of software solutions and the integration of mobile devices require a thorough analysis of the existing desktop landscape.

This "Consulting in a Box" offer analyses the risks and opportunities of migrating your existing desktop infrastructure into a virtual environment. To do this, our consultants determine the number of applications currently in use, their versions and the computing power required for desktop tasks. On the basis of recorded performance data, we design a model for a reliable and future-proof planning of the virtual desktop infrastructure. In a concluding meeting, we explain the advantages and disadvantages of a migration from a neutral perspective and advise you on possible migration paths.

Your benefit

- » You benefit of the know-how of our experienced and VMware certified consultants.
- » You will receive a documentation of the examined desktop environment and information on optimization options.
- » You will receive a well-founded analysis to decide whether and in which areas a VDI infrastructure offers advantages.
- » You know the economic consequences of your decision through well-founded statements on TCO and ROI.
- » You will receive clear recommendations for further optimization or migration steps.

Virtualization Check for Virtual Desktop Infrastructures

Objective

- » Recording and documentation of the currently used applications (incl. versions)
- » Projection of the current load behavior of typical desktop PCs from different departments on future server systems.
- » Determination and presentation of the advantages and disadvantages of a VDI environment
- » Definition of basic templates for an easy start with virtualization
- » Identification of devices from the current infrastructure that can be further used
- » Clarify in which area investments are necessary.

Our services

- » In discussions with IT managers, we identify typical devices for your desktop infrastructure.
- » We analyze your physical and virtual infrastructure and outline it together with you.
- » We collect performance data of the currently used hardware.
- » AddOn Consultants determine the number and equipment of future target systems from the values of the performance measurement.
- » We advise you on licensing issues and end devices.
- » In a workshop we present the results of our investigation and discuss the consequences with you.
- » In cooperation with the responsible parties, we will prepare a sound TCO/ROI analysis on request.
- » We record the results and hand over the documentation to you.
- » We formulate recommendations for further project steps.

Phone	E-mail	Order number	Duration	Prices are quoted exclusive of VAT and distance-based additional expenses.
+49 7031 7177 58	consulting@addon.de	CBV 09 up to 5 typical desktop PCs	3 days	€ 3 960,-
		CBV 10 up to 25 typical desktop PCs	5 days	€ 6 600,-

More successful Projects – “Consulting in a Box”

AddOn has drawn on its experience of finding optimal solutions for numerous projects to create an exceptional offer: Our “Consulting in a Box” packages. These stand for clearly defined consulting services for specific tasks. “Consulting in a Box” also means a structured

approach by experienced consultants, detailed analysis, professional documentation, presentation of results, open discussion of the best solutions plus specific recommendations for action.

You’ll find more “Consulting in a Box” offers for SAP, Virtualization, Microsoft, and Linux on our website www.addon.net/cib

You benefit from:

- » Best practice solutions
- » Targeted recommendations
- » Fixed-price consulting services
- » No further obligations
- » Consulting services available at short notice
- » Short duration
