

SAP S/4HANA Sandbox-in-the-Box

Is your company planning to switch to S/4HANA? Your IT and business departments would like to familiarize themselves with an S/4 system at an early stage? You do not have enough IT staff or sufficient HANA or Linux know-how to install the S/4 systems yourself? Then this solution-in-a-box offer is just right for you.

In this box, we offer you a fully installed S/4 system on the latest S/4 release including current support packages and feature packs. Our box offers you added value in many respects. For example, with a Greenfield approach you can load master data on a test basis and test your new business processes. But also with a Brownfield approach you have the possibility to test new Fiori Apps, new SAP transactions or new business processes with this sandbox. Independently of the Greenfield or Brownfield approach, you can test your customer-specific ABAP coding (Z programs).

Your benefit

- » **Fast:** Get a finished SAP S/4HANA system with minimal effort.
- » **Optimal:** The SAP S/4HANA system is set up optimally for you.
- » **Up-to-date:** You receive a system with the latest release and patch status.
- » **Practical:** Your IT staff gets to know the new features of SAP S/4HANA at an early stage and can test various scenarios.
- » **Flexibility:** The SAP S/4HANA sandbox can be deleted at any time and restarted with little effort.

SAP S/4HANA Sandbox-in-the-Box

Objective

- » Identification of possible „stumbling blocks“ during the SAP S/4HANA transition
- » First practical experience for your employees with SAP S/4HANA
- » Planning and driving forward the necessary transition to SAP S/4HANA
- » Overview of upcoming tasks and first definition of tasks
- » Risk and error minimization during SAP S/4HANA transition

Unsere Leistungen

- » **Variante 1:** SAP S/4HANA Sandbox System as Virtual Machine (vmdk File), if you are using VMware
- » **Variante 2:** SAP S/4HANA Sandbox System as database export, if you do not use VMware
- » **Optional:** We install the vmdk file or the database import at your site and set the system „ready-to-use“, if you do not want to perform these steps yourself.
- » **Optional:** After successful installation, we take over the operation of the SAP S/4HANA Sandbox as Managed Services for the duration of your test project.
